

NRP had this 7-story precast parking garage finished when they contacted BCSI. Due to the structure's residual capacity, the amount of tension allowed for the Barrier Cable solution was limited. BCSI designed a vehicular restraint and pedestrian fall protection system with only 5 cables and heavy-duty chain-link fence attached to it. That provided a fully code compliant solution. Within two months from initial request BCSI completed the project.

PROJECT: Riverfront Landing Apartments
(May 2018) Pittsburg, PA

CLIENT: The NRP Group

ARCHITECT: Jdavis Architects

OWNER: The NRP Group

VEHICULAR BARRIER CABLE SYSTEM
